

A man and a woman are smiling and embracing each other in a modern, well-lit interior space. The man is wearing a plaid shirt and the woman is wearing a grey sweater. The background shows a contemporary living area with a green wall and a wooden ladder.

Imagine a new home that sells itself.

Consumers Energy New Home Construction Program for Builders

Discover the value of building ENERGY STAR® homes.

Our New Home Construction program offers rebates on the types of high-quality, high efficiency homes your customers want.

Your customers will enjoy the following benefits for years to come:

- Reduced energy bills — ENERGY STAR certified homes deliver approximately 20% savings on annual energy bills.*
- Higher resale value — certified homes sell at a premium when compared to homes that don't have an ENERGY STAR rating.*
- Improved indoor air quality.
- A more comfortable home environment for higher customer satisfaction.

As a participating builder, you can experience:

- A stronger brand by leading ENERGY STAR market transformation.
- Enhanced customer satisfaction and improved reputation.

*energystar.gov

We're proud to support Michigan builders with rebates to achieve energy efficiency standards at a lower cost.

Thanks to our New Home Construction program, it's easier than ever to build an ENERGY STAR certified home.

Four Easy Steps To Receive Your Rebate

1. Work with a local Home Energy Rating System (HERS®) Rater to ensure that your homes are designed to meet ENERGY STAR guidelines. For a full list of ENERGY STAR requirements, visit energystar.gov. A Consumers Energy representative will assist you as you complete this process.
2. Build a qualified house. Your HERS Rater will qualify it and issue an ENERGY STAR certification.
3. Have your HERS Rater fill out and submit the rebate form online.
4. Receive your rebate payment!

Contact us for a full list of rebates or more information on how the New Home Construction program can benefit you and your customers.
