

HOW PERFORMING COMPREHENSIVE TUNE-UPS CAN HELP GROW YOUR BUSINESS

Our records indicate you may not have been able to join our recent cooling comprehensive tune-up training webinars, hosted by the Consumers Energy Home Solutions program.

As your ally in promoting energy savings and growing your business, Consumers Energy is offering a rebate to our residential customers who purchase comprehensive heating or cooling tune-ups from a participating contractor. Furnace, boiler and central air conditioner tune-up rebates make these services more affordable for customers—which means more business for you.

The webinars are now available on-demand for you and your team to watch at your convenience. The on-demand recordings are a great opportunity to train field technicians, service managers and administrative staff on the benefits of comprehensive tune-ups. To view the recordings, please visit the links below.
