

REMINDER:
**THE SIGHTLINE MOBILE APPLICATION SUBMISSION
PLATFORM HAS LAUNCHED**

The Consumers Energy and DTE Energy Heating and Cooling (HVAC) programs have recently launched the **Sightline Mobile** rebate application submission platform to improve your ability to submit rebate applications with greater ease and less delay. Sightline Mobile is a direct replacement of Power Rebate App (PRA).

Sightline Mobile (SLM) is an improved tool featuring easier, faster application submissions from the field, and is compatible with Apple iOS 11 and above, Android 6.0 (Marshmallow), as well as Windows computers and devices (Microsoft Surface).

Helpful Tip on Application Submissions:

- If you are currently offline, you can still click send and the application will wait in your inbox
 - On the *Sent* page of Sightline Mobile, If you have applications that haven't transmitted, due to poor network connectivity, you will see a notification in the lower right-hand corner that you have application(s) in your outbox which are waiting for a network connection to submit
 - When your device reconnects to the network, the application should automatically submit
 - Check your app regularly to ensure that all applications have submitted to the system

If you have any questions regarding the above or SLM usage, please do not hesitate to contact us.
