

Consumers Energy
Count on Us®

MAKE THIS YEAR YOUR MOST EFFICIENT ONE YET.

SAVE ON HIGH-EFFICIENCY HEATING, COOLING AND WATER HEATING EQUIPMENT WITH REBATES UP TO \$900.

RESIDENTIAL HEATING, COOLING AND WATER HEATING PROGRAM
CUSTOMER OVERVIEW

ConsumersEnergy.com/hvac

HOW CAN I GET A REBATE FROM CONSUMERS ENERGY?

When you buy energy-efficient heating, cooling and water heating equipment through a participating contractor, you're eligible for rebates up to:

- \$50 for a heating or cooling comprehensive tune-up
- \$400 for a high-efficiency natural gas furnace
- \$500 for a qualifying air conditioning system
- \$900 for a natural gas boiler

The savings continue even after you upgrade. If your electric heat pump, furnace or air conditioning unit is more than 15 years old, you can save up to 20 percent on heating and cooling costs with a high-efficiency model.*

HOW MUCH CAN I SAVE?

Your rebate amount depends on the type of equipment you install. The higher the efficiency, the bigger the rebate.

Want to maximize your savings? Make multiple purchases to combine rebates. For example, a Consumers Energy customer with combination natural gas and electric service could get a qualifying 97 percent AFUE natural gas furnace (\$400 rebate) with an electronically commutated motor (\$50 rebate), a 21 SEER air conditioning system (\$500 rebate) and a Wi-Fi thermostat (\$100 rebate) for a total of \$1,050 in rebates!

For a complete list of rebates, visit ConsumersEnergy.com/hvac.

HOW LONG WILL IT TAKE TO RECEIVE MY REBATE?

Expect to receive your rebate from Consumers Energy within six to eight weeks of submitting an application. You can check the status of your rebate application by calling us at **866-234-0445** on weekdays from 8 a.m. to 5 p.m.

THE PARTICIPATING CONTRACTOR NETWORK

Heating and cooling contractors listed on ConsumersEnergy.com/hvac can submit an application for a rebate.

We provide participating contractors with extensive program training to ensure customers receive the best service. Participating contractors are licensed and trained in quality assurance, program requirements and application submission.

Participating contractors will ensure:

- Equipment is properly sized and installed to provide the efficiency and performance it was designed to deliver
- Minimum equipment specifications have been met for rebate qualification
- Rebate applications are submitted properly for efficient processing

REBATE ELIGIBILITY

You must be a Consumers Energy customer to receive rebates through this program. If you apply for a rebate on natural gas equipment, you must be a natural gas customer. If you apply for a rebate on electric equipment, you must be an electric customer. If you are a combination natural gas and electric customer, you are eligible for both natural gas and electric rebates. Equipment must meet program eligibility guidelines.
