

## CONSUMERS ENERGY EXPANDS DUCTLESS MINI-SPLIT HEAT PUMPS REBATES

The Consumers Energy Heating, Cooling and Water Heating (HVAC) program is pleased to announce new **ductless mini-split heat pumps** to the rebate eligibility lineup.

In addition to the existing rebates for ductless mini-split heat pumps with SEER efficiencies 21 or higher, Consumers Energy is now offering rebates for heat pumps 18 through 20.99 SEER.

Ductless mini-split heat pump systems are a great alternative to electric resistant heat and outperform older heat pump systems. The 18-21 SEER heat pumps are available for any primarily heated homes with electric heat and can lower your customer's electric bills, while providing comfortable zoned heat.

Rebates will cover replacing an existing heat pump or an existing electric resistant heated home. Heat pumps 21 SEER and higher are eligible for a **\$350 rebate**. Heat pumps 18 through 20.99 SEER are eligible for a **\$250 rebate**.

These new updates are reflected on the Consumers Energy website, but will not be on marketing collateral currently in circulation.

Thank you for your continued support of the Consumers Energy HVAC program! Please contact your HVAC Account Manager or Account Advocate Team for extra support.
